

Product Management Leadership Framework

- The Product Management Leadership Framework shows all the things you need to think about if you're leading a product department, function, or team.
- The framework covers the four areas of the Product Operating Model – Strategy, People, Delivery, and Organization. How these are set-up will depend on the size, focus, and maturity of product management in your business. The framework also includes the playbook - tools and strategies needed to lead a product management function.

World class product management

focus

Product Operating Model

To cover the processes, governance, calendar, stakeholders, frameworks, artifacts, tools, and measurements needed in each of these areas.

Strategy

What we'll do, where we'll play, how we'll win

People

Finding, hiring, incentivizing, growing, measuring

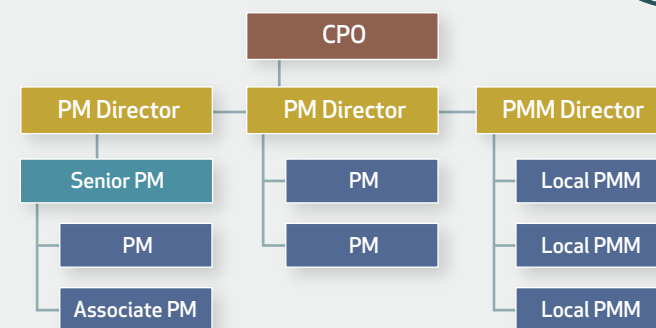

Delivery

Requirements, design, develop, test, deploy, maintain – the full product management lifecycle

Organization

How we are set-up, culture, responsibilities

Playbook to lead Product Management

Bringing it all together – practical tools to manage and drive the function.
